

Cut out along the dotted lines

Use this template to make your own paper spinning-wing aircraft.

WHAT TO DO:

1. Print this template on stiff paper and **cut out the shapes**.
2. Attach a paper clip on the **narrow end** of each shape.
This will make your paper seed heavier on one side, just like a maple seed.
3. **Drop your paper seed.** Then **adjust the position of the paper clip** until it starts spinning as it falls.
4. That's it! **Try experimenting** with different wing shapes and different paper clip positions, and have fun with your spinning paper seed.
